

Deepthi K

Bangalore, India | deepthikgowda1994@gmail.com | +91 9448935404

Professional Summary

Senior Software Engineer with 8+ years of experience building scalable, high-performance web applications and modern UI architectures. Specialized in Angular, TypeScript, and enterprise-grade frontend development with strong expertise in accessibility (WCAG), automated testing, and large-scale application migrations. Proven track record of improving code quality, reducing test failures, and delivering reusable, maintainable components in complex enterprise products.

Professional Experience

OneTrust — Senior Software Engineer - Bangalore, India | May 2023 – Present

- Led frontend development for IT risk Management, Enterprise Risk and controls modules.
- Migrated large-scale application from **Angular 11 to Angular 15**, improving maintainability and long-term framework support.
- Implemented coding standards and conducted code reviews that improved code quality and reduced production issues.
- Built workflow enhancements for **Risk Tracking** and also worked on workflow Exception, **Risk Assessment Factors**, and **Risk Scoring** feature.
- Ensured accessibility compliance with **WCAG guidelines** across multiple UI components.
- Debugged and fixed failing automated test suites, significantly improving the reliability module.
- Used AI-assisted development tools (GitHub Copilot, GitLab Duo) to accelerate code generation and test development.

OneTrust — Software Engineer - Bangalore, India | Nov 2021 – Apr 2023

- Developed key features for the **Risk Management platform**, including Score Profiles and Risk Hierarchy modules.
- Implemented the **Evidence Task feature** for the Controls team.
- Contributed to scalable UI components used across multiple product modules.

Private Circle — UI Developer - Bangalore, India | Jan 2021 – Oct 2021

- Led migration of legacy UI from **Jinja templates to Angular 11**, modernizing the frontend architecture.
- Built reusable Angular components to standardize UI development.
- Developed major product modules including **Listing Screen, Contact Database, PC Export, and Prosumer Export**.

Happiest Minds Technologies — Senior Software Engineer - Oct 2018 – Jun 2019

- Worked on a DevOps initiative project for **Honeywell** at client location.
- Built web applications using **ASP.NET Razor Pages**.
- Developed a reusable **C# SQL Server access library** and implemented **XUnit-based unit testing**.

Happiest Minds Technologies — Software Engineer - Oct 2016 – Sep 2018

- Designed interactive dashboards using **AngularJS, JavaScript, Highcharts, HTML, CSS, SASS, and LESS**.
- Developed backend services using **C#, ASP.NET MVC**.
- Implemented **NUnit testing** to improve backend reliability.

Key Achievements

- Improved automated test stability by debugging and fixing failing tests, reducing failure rates in CI pipelines.
- Accelerated development productivity by integrating AI-assisted tools for code generation and testing.
- Mentored junior engineers in frontend development and best coding practices.

Core Skills

- **Frontend:** Angular, AngularJS, TypeScript, JavaScript, HTML5, CSS3, SCSS, SASS, LESS
- **Architecture:** Scalable UI Architecture, Reusable Component Design, Performance Optimization
- **Testing:** Automated Testing, Unit Testing, Test Debugging
- **Tools:** Git, GitHub Copilot, GitLab Duo, Windsurf
- **Accessibility:** WCAG Compliance

Education

Sri Jayachamarajendra College of Engineering

Bachelor of Engineering (Electronics and Communication)

Mysore, India
