Summary

8.5+ years of experience working in a corporate environment as a front-end UI/Web developer and Java Spring Boot, WCAG/Accessibility (Code Coverage - 80%), Micro-Frontend Architecture. Strong technical skills in complex website development including web-based applications. Experience developing highly interactive web applications utilizing JavaScript, ReactJS, Redux, Context API, WCAG, HTML5, CSS, JSON, Cypress(E2E), Angular2/4/...16(latest), Java8, AG-GRID, Hibernate, Spring Boot Applications and Bootstrap and integrating Restful API's. In depth knowledge of web technologies and standards to deliver the best experiences across web and mobile devices including responsive Web UI. Worked in various version control systems - SVN, GIT in depth.

Work Experience

Senior Software Engineer, *OneTrust*

05/2025 – 03/2026

Worked on **Consent** (a product of OneTrust), which focuses on managing cookies and tracking user behavior/preferences to ensure compliance with privacy regulations.

Worked on Micro Frontend Architecture to manage our internal libraries.

Worked on few libraries which was written in Reactjs, as we were upgrading from ReactJS to Angular.

Worked on Accessibility (WCAG), coverage ratio was 80%.

Contributed to multiple internal libraries. Our team primarily works on maintaining and enhancing these libraries, creating new release versions, and updating the framework so applications receive the latest UI updates and improvements.

Backend - 20% - 30% Worked on Java Spring Boot with SQL

Also worked on the **Trust Center Portal**, which has recently been separated from the Consent product. Previously it was part of the Consent module, but it now functions as an independent product.

In this portal, customers can create and manage their own trust portals, update branding, and customize the appearance.

The portal also allows users to add different sections such as **Text Blocks, Consent Preferences**, and other informational components.

Senior Frontend Engineer, *WISSEN TECHNOLOGY(CLIENT - MORGAN STANLEY)*

09/2021 – 05/2025

Bengaluru

- Design, implement, and maintain Vanilla Javascript application in Morgan legacy codebase.
- Write clean, maintainable, and efficient code.
- Stay updated with the latest Angular developments, best practices, and tools.

- AG-GRID
- NGRX

Academic projects

CMBS (Commercial Mortgaged Backed Securities)

- Commercial Mortgage backed Securities 2021-Present project, so understand how Loans process .
- How Commercial lenders are paying off their loans/how they are paying rent monthly etc.
- Working on CMBS Securitization.
- How to handle DEFAULT loans and when it handover to special servicer !

PATHOLOGIST APPLICATION

- Created Pathologist Application - so 2020(Feb) - 2021 (Sept) in this project Pathologist can found how much % of tissue has been affected by any disease,so this much % will get marked using our AI.
- So i have created the full UI - Tech stack was into HTML/CSS/JS/ANGULAR
- As this project has 2 modules -
- 1st was to draw how much tissue has been affected using D3.js (OpenSeadragon)/HTML/CSS
- 2nd was to show listing of tissue samples which has already been marked by PATHOLOGIST and ready for final report.
- 2nd was into ANGULAR

ECOMMERCE APPLICATION

- Have worked on Shopping 2019(Feb) - 2020(feb) Application (Based out of SAUDI ARABIA).
- Created full UI independently using Angular.
- Integrated PAYMENT GATEWAY - PAYTABS.
- Managed to work on Routing Configuration (Authentication and Authorization)
