Contact no: 9916485596

Address: #210, 1st L main road

Nagarbhavi second stage

Bengaluru - 560072

SKILLS:

- Java
- Spring
- Spring-Boot
- Microservices
- REST Apis
- SQL
- ActiveMQ
- Redis
- Kafka
- Microsoft Azure
- System Design

TOOLS:

- Maven
- Git

• PROFILE

Dynamic professional with 10+ years of experience, combining leadership and technical expertise to drive growth, innovation, and organizational success.

• EXPERIENCE

Principal software engineer- Onetrust

May 2019 – March 2026

- Worked on projects which involves maximum code changes in libraries making it platform point of view/generic, so that each microservice can easily adopt the libraries with minimum code changes with some configurations.
- Worked on features involving Kafka, ActiveMQ and Redis for messaging and caching support.
- Developed and maintained comprehensive documentation of development work, facilitating knowledge sharing among team members.
- Skilled in preparing technical designs aligned with requirements, developing proof-of-concepts (POCs), and transitioning solutions seamlessly to the team for implementation.

- Postman
- IntelliJ
- Bitbucket
- Jira
- Datadog

LANGUAGES:

- Kannada
- English

INTERESTS:

- Playing Badminton
- Drawing

- Experienced in leading multiple teams, effectively distributing work, and fostering collaboration to achieve project goals.
- Strong ability to balance strategic planning with hands-on technical contributions, ensuring both innovation and delivery excellence.
- Regularly reviewed peers code contributions, offering constructive feedback to enhance overall product quality.
- Worked with project managers, developers, quality assurance and customers to resolve technical issues.
- Worked on multiple product features, including assessment automation and data mapping, contributing to enhanced functionality and streamlined processes.
- Worked on feature to add different kind of rule actions and its execution using libraries like Spring-expression to evaluate the conditions added in Rule.
- Worked on most features that involve communication between services using Feign client and asynchronously by publishing the events.
- Also contributed to automation using selenium and cucumber as in-sprint automation.
- Onetrust is heavily built on Microsoft Azure, with 95% of its environment running on the platform.

Software Engineer – Manhattan Associates

July 2015 – April 2019

- At Manhattan Associates, a leader in supply chain management solutions, I contributed to multiple projects including Transportation Lifecycle Management and Order Lifecycle Management.
- Collaborated with consultants to prepare functional design documents and created technical design documents for new modules, while driving enhancements and bug fixes across all components of the TLM product.
- Conducted software analysis, programming, unit testing, debugging, and maintained version control to ensure quality and stability throughout the development lifecycle.
- Delivered client solutions by preparing SDNs and FixPacks, supporting users with documentation, and resolving both production and non-production application issues

Nokia Networks

April 2015 – June 2015

- Have completed three months internship in Nokia Networks. Experience in unit testing and SCT Automation.

➤ EDUCATION

- DR. Ambedkar Institute of Technology, Bengaluru
- BE in Computer Science
- CGPA – 9.23
